Applicant's representative contacted the Examiner on 14 July 2004 to request that an initialed copy of the 1449 submitted with the IDS of 22 March 2004 be supplied, as none was included with the notice of allowability.

In reviewing the case file, Examiner discovered that he had failed to review the IDS and provide a copy of the 1449 when allowing the case. The Examiner has now reviewed the cited documents.

The claims of the invention relate to a method and apparatus for measuring intraocular pressure that includes contacting the eye as part of the measurement. Both of the cited US patent references are directed to non-contact tonometry, and thus, do not teach or suggest the claimed method or apparatus. The claims further require control and determination of a pressing force and calculation of change in a frequency characteristic. There is no such disclosure in the cited abstract from the SU982649 reference. The claims remain allowable over the art of record.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric F Winakur whose telephone number is 703/308-3940. The examiner can normally be reached on M-Th, 7:30-5; alternate Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mary Beth Jones can be reached on 703/308-3400. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
